

The Millo-Check™ : Logbook management (without daily log scanning)

SPECIAL ATLANTIC TRUCK SHOW

\$350

PLUS \$10 for each driver add.

The application verifies the drivers' daily log according to Canadian and American laws. It points out violations and failures and generates summary reports. Daily logs containing mistakes can be corrected directly. The application converts drivers' free days in log off. Driver notification letters (warning or congratulation) are automatically produced. Each driver can have a maximum speed set up in his file according to his work and in which country he's driving. Failures can be set up for each company: exceeding maximum speed, missing signature, missing papers, wrong odometers, false logs, inconsistency in arrival and departure time, mismatch between driver's duty and type of activity, etc.
